

## A Breath of Fresh Air –

### **Hilton Austin Airport is 100% Smoke Free.**

The policy includes all guest rooms, restaurants, lounges, meeting rooms, public space and employee work areas. Currently 100% of our Hilton guest rooms are non-smoking, and smoking is prohibited in all public spaces due to local laws. Demand for non-smoking rooms continues to rise with new information from the Surgeon General on the hazards of secondary smoke.

We look forward to seeing you – experience the clear difference that Hilton offers.

#### *Smoke-Free Hotel Answers*

[1. What is Hilton Austin Airport's Smoke-Free Hotel Environment strategy?](#)

Hilton's Smoke-Free Hotel Environment strategy went into effect January 1, 2008.

This initiative includes all guest rooms, restaurants, lounges, meeting rooms, public space and associate work areas. Currently 100% of our Hilton guest rooms are non-smoking, and smoking is prohibited in all public spaces due to local laws. Demand for non-smoking rooms continues to rise with new information from the Surgeon General on the hazards of secondary smoke.

[2. Why has Hilton Austin Airport made this decision?](#)

The vast majority of requests from our guests favor a completely smoke-free hotel environment. The only way to provide this experience is to not allow smoking within the building. Therefore, we extend this preference throughout the entire hotel. We offer special designated smoking areas outside the building to accommodate the needs of our guests who smoke.

[3. What did you do to convert your property to non-smoking?](#)

All areas of our property periodically undergo a thorough process to cleanse them from environmental pollutants, including smoke. Announcing this decision in advance allowed our property time to complete that extensive cleaning in our smoking guest rooms as well as public areas.

**4. What room renovations took place?**

Renovations were not required. However, all smoking rooms went through an extensive cleaning process to include carpet, walls and draperies.

**5. How are smokers accommodated? Will they be able to smoke within the building?**

While there are no smoking areas within the building, smoking is allowed outside in special designated areas. We provide a smoking oasis located in our private courtyard.

**6. What measures is the Hilton Austin Airport taking to enforce this policy?**

This policy is part of our Quality Assurance process and we have trained our associates to respond accordingly. For example, housekeepers are taught to look for signs of smoking in the hotel. Guests are reminded at the point of reservations and upon arrival that smoking is not allowed. Pre-arrival email notifications are also include a reference to the policy.
